

QUICK SETTING VERY FAST AND STRONG INITIAL TACK

FEATURES

- Solvent Free
- Waterbased
- Strong mounting adhesive

AREAS OF APPLICATION – SUITABILITY

- On absorbent surfaces such as concrete, timber, stone.
- PVC (Not suitable for PE, PP, and PTFE)
- Vertical Bonding
- For Skirting boards and other profiles
- Plaster board or similar.
- Metal profiles

NOTE

- **ONE SURFACE MUST BE ABSORBENT**
- Not for Surfaces continually exposed to water or humidity

TECHNICAL DATA

Technical Data (20°C – 60% R.H.)			
Appearance	White paste	Indicative yield	Approx 10Lm for 6mm bead
Density	1.35kg per litre	Application temperature	From +5°C to +35°C
Open time	5 -10 minutes	Tool cleaning	Immediately after use with water
Setting time	Immediate	Storage	12 months in original sealed container at temperature >10°C Frost Sensitive
Initial tack	~ 120kg/m2	Package size	310ml cartridges

APPLICATION

Make sure the surface to be bonded is in optimal condition, flat, clean, free of dust and loose parts and not subject to rising damp.

Apply Acoulime Construction Adhesive with the appropriate canister gun for small quantities or for continuous beading, on only one of the two surfaces to be bonded. Immediately join the parts and place them applying an even pressure. Use a support for fixing heavy materials until the adhesive is completely dry. Repositioning of the glued materials is possible if done within 10 minutes.

CLEANING

Any surplus residue of the product, while fresh, can be cleaned with water. Use a spatula to remove any fresh adhesive residue along the edges of the glued object.

Once hardened, Acouslime Construction Adhesive can be overcoated with either waterbased or solvent based coatings.

SAFETY RULES

PRODUCT FOR PROFESSIONAL USE. Strictly adhere to what is stated on the labelling and consult Safety Data Sheets before using the product.

DISPOSAL

Dispose of unused product and empty packaging in accordance with Australian standards. Keep out of waterways.
